PROFILE SUMMARY

Senior UX Researcher specializing in OTA product strategy across hotels and flight, with 6+ years driving research that directly shapes roadmap decisions. At Wego, built and scaled the hotel research function from zero and led the strategic research for the company's transition from metasearch to OTA, informing high-impact decisions including deferred payment models, loyalty direction, and self-service cancellations.

Operates beyond execution by reframing problem spaces, challenging assumptions, and triangulating behavioral and attitudinal data to influence business-critical decisions across diverse markets, with experience spanning 15+ countries and 30+ nationalities.

PROFESSIONAL EXPERIENCE

Senior UX Researcher Aug 2023 – Apr 2026

Wego.com | Remote (Dubai, UAE)

- Built and scaled Wego's hotel UX research function from zero, leading 50+ studies across flight and hotel booking journeys that directly informed product OKRs and roadmap decisions across hotel and flight squads. Built the company's first end-to-end user knowledge base to centralize insights.
- Led strategic research for Wego's hotels transition from metasearch to OTA, reframing key user and business problems and directly influencing roadmap decisions including deferred payment models (Pay at Hotel, Pay Later), loyalty program direction, and self-service cancellations.
- Challenged initial assumptions behind an underperforming hotel OTA A/B test by reframing the problem and leading multi-method triangulation (usability testing, behavioral analytics, and benchmarking across Agoda, Booking.com, Expedia, and Trip.com) uncovering root causes beyond surface metrics.
- Drove flight checkout flow revamp through behavioral session analysis, identifying key user friction at booking confirmation, insurance opt-in, and step navigation. Prioritized issues using a Major/Minor severity framework, directly informing redesign decisions and the A/B testing pipeline.
- Uncovered market-specific behavioral differences across MENA users, including significantly lower tolerance for missing payment options among Arabic-speaking users, directly influencing localization and payment prioritization strategy.
- Built Wego's research infrastructure from zero, including a centralized insights repository and automated multi-source feedback pipeline (app reviews, social media, and support tickets) powered by workflow automation and AI classification. Established continuous research rhythms through monthly user interviews and recurring feedback trend reporting, enabling ongoing product insight generation.

Senior UX Researcher May 2022 – Jul 2023

Blibli.com | Jakarta, Indonesia (Hybrid)

- Built Blibli's first-ever Customer Experience Dashboard using Qualtrics and TextIQ, reducing operational reporting workload by ~30% through automation. Dashboard adopted as single source of truth across cross-functional stakeholders.
- Ran foundational quick commerce research (in-depth interviews, usability testing, and survey), directly influencing Blibli's strategic decision to use its own logistics ecosystem for quick commerce fulfillment.

- Mentored junior researchers and contributed to ResearchOps through documentation and training materials.

UX Researcher Aug 2020 – Jan 2022

Aleph Labs | Jakarta, Indonesia (Hybrid)

- Conducted user and market research for clients including Maybank, Daihatsu, Telkomsel, and Bank Syariah Indonesia (BSI).
- Led BSI (Indonesia's largest Islamic bank) mobile banking app revamp research (in-depth interviews, card sorting, and usability testing) informing a full app redesign post-merger of three state-owned banks; redesign reduced onboarding steps by more than half.
- Built Telkomsel's research playbook and centralized research repository, used across project teams.

SKILLS & TOOLS

- **Research Methods:** Usability Testing, In-Depth Interviews, Diary Studies, Card Sorting, Surveys, Heatmap & Session Recording Analysis, Competitive Analysis, Heuristic Evaluation
- **Analytics & Data:** Microsoft Clarity, Looker, BigQuery, Qualtrics (incl. TextIQ), Google Analytics
- **Automation & AI:** Workflow automation (n8n), Claude, ChatGPT, v0.dev
- **Languages:** English (Professional), Indonesian (Native)

EDUCATION
